

Business Administration Diploma – Supply Chain Management

Combine core business skills with a specialization in supply chain — logistics, procurement, demand forecasting and operations.

Diploma

Supply Chain

100% Online

Pending approval

PROGRAM OVERVIEW

The Business Administration Diploma with a specialization in Supply Chain Management combines a solid business-administration foundation with the in-demand skills that keep goods and services moving.

You will learn to plan and design efficient logistics networks, forecast demand using industry best practices, determine sourcing solutions, and assess risk across sourcing and operations to prevent supply chain failures.

WHAT YOU WILL LEARN

- Plan and design efficient logistics networks
- Forecast product demand using predictive analytics
- Determine sourcing solutions from supply- and demand-side analysis
- Assess and mitigate risk across sourcing and operations
- Manage production planning, control and lean operations
- Apply core business skills: accounting, marketing, management and communication
